

Letter of invitation to the Conference on International Math Education and Course Training

Dear Mr./Ms. _____ :

Under the globalization trend of education, the International Baccalaureate Organization (IBO) has drawn the attention of education practitioners in China because of its unique philosophy on education and its emphasis on research, reflection, cooperation, critical thinking and trans-cultural diversity.

In order to discuss the developments of International Baccalaureate (IB) math education in China, to address the challenges and issues met as for the training of practitioners in IB math education, and to share the experience in IB related teaching and to find potential problems that needs attention, the math department of East China Normal University will host, on May 17, 2017, the Conference on International Math Education and Course Training. Education practitioners from High School Affiliated to Fudan University, Jincai High School, Shanghai High School and Concordia International School are already invited to this conference.

We hereby invite you to attend this conference, to share with us your opinions on International Math education and trainings of practitioners in the area, and also to share your experience on internal courses and your reflection on them.

Looking forward to seeing you in the conference.

Sincerely Yours

Department of Mathematics
East China Normal University
Apr. 26, 2017
